EXPERIENCE

- **MERKLE DACH**

August 2025 - Present
e-commerce

- **DEVOTEAM CYBERTRUST PORTUGAL**

November 2024 - July 2025
Cybersecurity Platform

- **ISERVICES**

June 2023 - October 2024
e-commerce

- **HCPRO CRM - SOFTWARE DE GESTÃO IMOBILIÁRIA**

March 2022 - June 2023
CRM Software for Real State

EDUCATION

- **EISNT - CENTRO DE FORMAÇÃO PROFISSIONAL E CONSULTORIA**

Level 4 Computer Technician - Systems
Python certification
Power BI certification
Methodological principles of programming certification

- **CINEL**

Programming Languages for Web
Certification

PROFILE

PHP developer specialized in backend architecture and high-performance API design using Symfony, Laravel, and Slim. Strong focus on SQL performance optimization, caching strategies, and automation through cronjobs. Experienced in building and extending large-scale e-commerce platforms with solid knowledge of CS-Cart internals, including add-on structure, checkout flows, and data layer integrity. Known for methodical debugging and investigative problem-solving, ensuring stability and reliability in complex systems. Committed to robust code quality, version control discipline, and automated testing with PHPUnit to deliver maintainable, secure, and production-grade solutions.

- Implemented backend features using PHP (Symfony, Laravel, Slim).
- Developed secure forms with validation and CSRF protection.
- Built APIs for data import/export and third-party integrations.
- Created authentication, permissions, and data visualization modules.
- Optimized SQL queries and caching for maximum performance.
- Automated processes with cron jobs and RabbitMQ queues.
- Maintained code quality using PHPUnit, Git flow, and reviews.
